

Raw Data

Note:

The `id` and `V...` variables refer to the census-tract level.

All other variables refer to the district level.

Variables

'UF_x' - state identifier (integer)

'Código do Município IBGE' - municipality identifier code

'Município_x' - municipality name (string)

'Área' - polygon identifier: district (string)

'Nome da Área' - district name (string)

'Número de Domicílios' - number of households (integer)

'Número de Habitantes' - number of inhabitants (integer)

'Renda média domiciliar\nR\$' - average household income (float)

'Grupo de percentis de acordo com a densidade de estabelecimentos saudáveis (in natura e misto)' - percentile group based on the density of healthy food establishments, i.e., in natura and mixed establishments (string)

'Densidade de estabelecimentos saudáveis (in natura + misto)\n10 mil hab' - density of healthy food establishments per 10,000 inhabitants (float)

'Densidade de estabelecimentos não saudáveis (ultraprocessados)\n10 mil hab' - density of unhealthy, ultra-processed food establishments per 10,000 inhabitants (float)

'Número de feiras livres' - number of open-air street markets (integer)

'Número de estabelecimentos In natura na base da RAIS' - number of in natura food establishments in the RAIS database (integer)

'Número de estabelecimentos mistos na base da RAIS' - number of mixed food establishments in the RAIS database (integer)

'Número de estabelecimentos ultraprocessados na base da RAIS' - number of ultra-processed food establishments in the RAIS database (integer)

'Total de estabelecimentos de alimentação na base da RAIS' - total number of food establishments in the RAIS database (integer)

'Hipermercados\ncnae 4711301' - number of hypermarkets (CNAE 4711301) (integer)

'Supermercados\ncnae 4711302' - number of supermarkets (CNAE 4711302) (integer)

'Minimercados, mercearias e armazéns\ncnae 4712100' - number of minimarkets, grocery stores, and general stores (CNAE 4712100) (integer)

'Padaria e confeitaria de revenda\ncnae 4721102' - number of retail bakeries and pastry shops (CNAE 4721102) (integer)

'Varejista de laticínios e frios\ncnae 4721103' - number of dairy products and cold-cut retailers (CNAE 4721103) (integer)

'Varejista de doces, balas, bombons e semelhantes\ncnae 4721104' - number of retailers of sweets, candies, chocolates, and similar products (CNAE 4721104) (integer)

'Açougues\ncnae 4722901' - number of butcher shops (CNAE 4722901) (integer)

'Peixarias\ncnae 4722902' - number of fish markets (CNAE 4722902) (integer)

'Varejista de hortifrutigranjeiros\ncnae 4724500' - number of fruit, vegetable, and produce retailers (CNAE 4724500) (integer)

'Lojas de conveniência \ncnae 4729602' - number of convenience stores (CNAE 4729602) (integer)

'Produtos alimentícios não especificados \ncnae 4729699' - number of retailers of unspecified food products (CNAE 4729699) (integer)

'Restaurantes\ncnae 5611201' - number of restaurants (CNAE 5611201) (integer)

'Bares e outros estabs bebidas \ncnae 5611202' - number of bars and other drinking establishments (CNAE 5611202) (integer)

'Lanchonetes, casas de chá, de sucos e similares\ncnae 5611203' - number of snack bars, tea houses, juice bars, and similar establishments (CNAE 5611203) (integer)

'Ambulantes de alimentação \ncnae 5612100' - number of mobile food vendors (CNAE 5612100) (integer)

'Cantinas\ncnae 5620103' - number of cafeterias/canteens (CNAE 5620103) (integer)

'Alimentos preparados para consumo domiciliar\ncnae 5620104' - number of establishments preparing food for home consumption (CNAE 5620104) (integer)

'COD_DIST' - district identifier (integer)

'ID' - list of identifiers from the IPVS and in natura datasets (integer)

'AREA' - list of areas associated with each identifier (float)

'CD_GEODI' - polygon code associated with each identifier, generated through GeoPandas (integer)

'TIPO' - classification of each identifier as urban or rural (string)

'CD_GEODM' - seven-digit IBGE municipality code from the shapefile (integer)

'V1' - list of seven-digit IBGE municipality codes (integer)

'V2' - list of municipality names (string)

'V3' - list of metropolitan-region codes (integer)

'V4' - list containing the metropolitan-region name field, coded as 0 (integer)

'V5' - list of administrative-region codes (integer)

'V6' - list of administrative-region names (string)

'V62' - list of district names (string)

'V8' - list of census-tract location/situation codes (string):

- 1 - Urbanized area of a city or town
- 2 - Non-urbanized area of a city or town
- 3 - Isolated urban area
- 4 - Rural settlement with urban extension
- 5 - Isolated rural settlement: village
- 6 - Isolated rural settlement: nucleus
- 7 - Isolated rural settlement: other settlement
- 8 - Rural area, excluding rural settlements

'V9' - list indicating whether the census tract is a subnormal settlement (` S` / ` N`); values may vary within the same district:

N - Non-special

S - Subnormal settlement

'V10' - list of IPVS vulnerability groups (string); it can be transformed into a numerical representation, and values may vary within the same district:

1 - Extremely low vulnerability

2 - Very low vulnerability

3 - Low vulnerability

4 - Medium vulnerability

5 - High vulnerability in urban areas

6 - Very high vulnerability in urban subnormal settlements

7 - High vulnerability in rural areas

0 - Unclassified

'V11' - list of private and collective households (integer); values may vary within the same district

'V12' - list of permanent private households (integer); values may vary within the same district

'V13' - list of total improvised private households (Boolean); values may vary within the same district

'V14' - list of residents in permanent private households (integer)

'V15' - list of the average number of residents in permanent private households (float)

'V16' - list of the proportion of children aged 0 to 5 years in the population (float)

'V17' - list of the total number of household reference persons (float)

'V18' - list of the average household income of permanent private households (float)

'V19' - list of per capita income in permanent private households within the census tract (float)

'V20' - list of the proportion of households with no per capita income (float)

'V21' - list of the proportion of households with per capita income up to one-eighth of the minimum wage; proxy for income up to BRL 70 (float)

'V22' - list of the proportion of households with per capita income from one-eighth to one-half of the minimum wage; proxy for BRL 70 to BRL 261 (float)

'V23' - list of the proportion of households with per capita income from one-half to two minimum wages; proxy for BRL 261 to BRL 914 (float)

'V24' - list of the proportion of households with per capita income above two minimum wages; proxy for more than BRL 914 (float)

'V25' - list of the proportion of private households with nominal monthly income up to one-half of the minimum wage (float)

'V26' - list of the proportion of private households with nominal monthly income up to one-quarter of the minimum wage (float)

'V27' - list of the average age of household reference persons (float)

'V28' - list of the average income of the household reference person (float)

'V29' - list of the proportion of literate household reference persons (float)

'V30' - list of the proportion of household reference persons aged 10 to 29 years (float)

'V31' - list of the household reference person's income share in total household income, expressed as a percentage (float)

'V32' - list of the average age of female household reference persons (float)

'V33' - list of the proportion of literate female household reference persons (float)

'V34' - list of the proportion of female household reference persons younger than 30 years (float)

'V35' - list of the average income of female household reference persons (float)

'V36' - list of Factor 1 values (float)

'V37' - list of Factor 2 values (float)

'V38' - list of rural Factor 1 values (not defined / None)

'V39' - list of rural Factor 2 values (not defined / None)

'V40' - list of the proportion of permanent private households supplied with water from the public water network (float)

'V41' - list of the proportion of permanent private households with an exclusive-use bathroom or toilet and sanitation through a public sewer/stormwater network or septic tank (float)

'V42' - list of the proportion of permanent private households with waste collected by a cleaning service or cleaning-service container (float)

'V43' - list of the proportion of permanent private households with electricity (float)

'V44' - list of the population residing in collective households, at the municipality level (integer)

'V45' - list of the population residing in improvised private households, at the municipality level (integer)

'V46' - list of the population residing in permanent private households, at the municipality level (integer)

'V47' - list of the population residing in rural areas, at the municipality level (integer)

'V48' - list of the population residing in urban areas, at the municipality level (integer)

'V49' - list of the total resident population, at the municipality level (integer)

'geometry' - geometry generated through GeoPandas

'num IPVS' - numerical transformation of the `V10` IPVS vulnerability-group category (integer)

'id' - list of census-tract identifiers; multiple identifiers may be associated with the same district (integer)

'BairrosSP' - neighborhood identification code for São Paulo (integer)

'BairrosFortaleza' - legacy dataset field; contains missing values (`NaN`)

'BairrosRJ' - legacy dataset field; contains missing values (`NaN`)

'CNAE2.0Classe' - list of classifications under the most recent version of the Brazilian National Classification of Economic Activities (CNAE) (integer)

'CNAE95Classe' - list of classifications under the former CNAE 1995 classification system (integer)

'QtdVínculosCLT' - list of counts of formal employment relationships under the Consolidation of Labor Laws (CLT) regime (integer)

'QtdVínculosAtivos' - list of counts of active employment relationships (integer)

'QtdVínculosEstatutários' - list of counts of statutory employment relationships (integer); most values are zero

'IndAtividadeAno' - list of Boolean indicators of establishment activity during the reference year; most values are one

'IndCEIVinculado' - list of Boolean indicators of linkage to the CEI registry; most values are zero

'IndEstabParticipaPAT' - list of Boolean indicators of establishment participation in the Workers' Food Program (PAT)

'IndRaisNegativa' - list of Boolean indicators identifying establishments with a negative RAIS declaration

'IndSimples' - list of Boolean indicators identifying establishments under the Simples tax regime

'Município_y' - municipality code generated through GeoPandas

'NaturezaJurídica' - list of legal-nature codes for establishments (integer)

'RegiõesAdmDF' - list of Federal District administrative-region codes (integer); all values are zero

'CNAE2.0Subclasse' - list of CNAE 2.0 subclassifications, providing a more detailed activity classification than `CNAE2.0Classe`

'TamanhoEstabelecimento' - list of establishment-size codes (integer)

'TipoEstab_A' - list of establishment-type codes; all values are one

'TipoEstab' - list of establishment-type labels (string); only `cnpj` is present

'UF_y' - state identifier (integer); all values correspond to code `35`

'IBGESubsetor' - list of IBGE economic-activity subsector classifications (integer)

'CEPEstab' - list of establishment postal codes (integer)

'in_natura' - indicator of whether the establishment sells in natura products; stored as an empty value or `1`. Its sum is represented by `obj in\_natura`.

'ultraprocessado' - indicator of whether the establishment sells ultra-processed products; stored as an empty value or `1`

'misto' - indicator of whether the establishment sells products from multiple food categories; stored as an empty value or `1`

'obj in_natura' - sum of `in\_natura` indicators in the district (integer)
